The Howler Advantage-SoftShock with PORON

SOFTSHOCK uses an advanced shock absorbent polymer called **PORON**, which carries the seal of approval by the American Podiatric Medical Association. **PORON** out-performs all other cushioning materials and will not flatten out with prolonged wear.

Dual Density Sole (PU/NR)

- PU (Polyurethane Midsole)** - flexibility, lightweight, shock absorbing, comfort
- NR (Nitrile Rubber Outsole)** - Heat resistant to 300°C, Hydrolysis resistant, excellent slip resistant in dry & wet areas, better cut & abrasion resistant, resistant to most oils, acids and alkalis.

Grip Lugs & cleat design for better slip resistant on oily surface

Available in sizes 4½ – 13½

All Howler Footwear meets Australian/New Zealand Safety Footwear Standards AS/NZS 2210:3

Complies or exceeds ANSI Standards ASTM F 2413-05
